Sommaire :

Annexe 1 : crues M99, D99 M01

Annexe 2 : crue J95

Annexe 3 : crue J82

Annexe 4 : crue J55

Annexe 5 : crue D93

Annexe 6 : crue F70

## Annexe 1

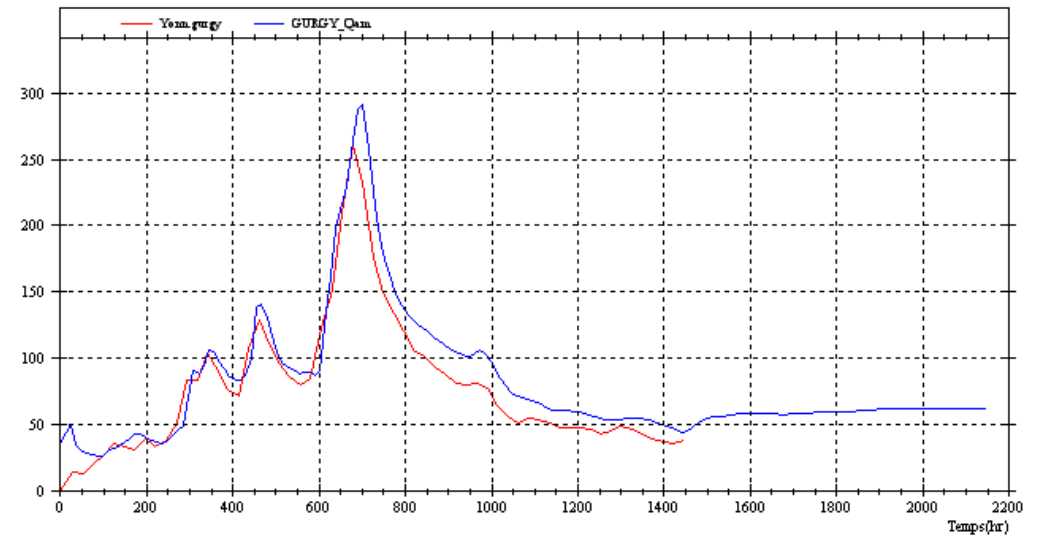

**MODELE YONNE AMONT – Crues M99, D99, M01**

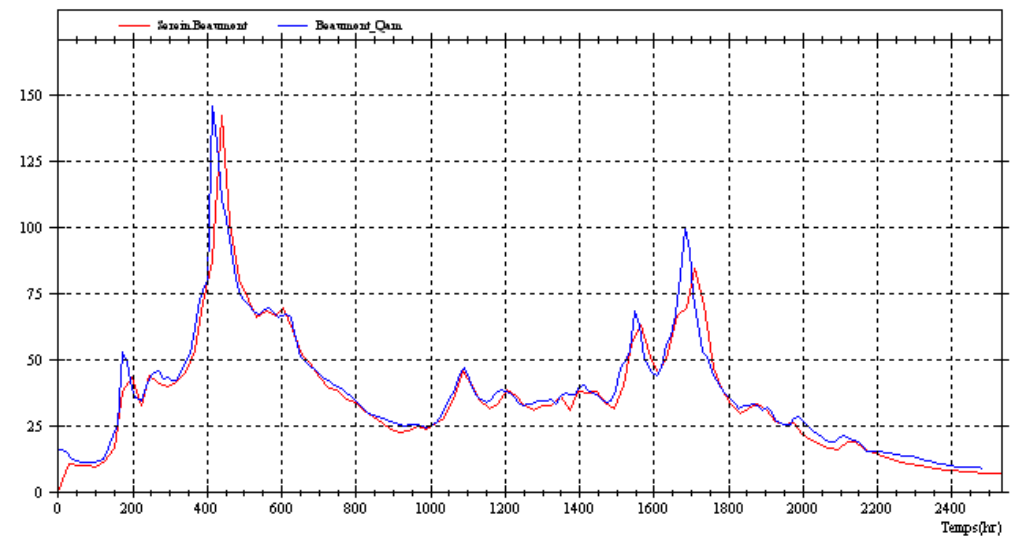

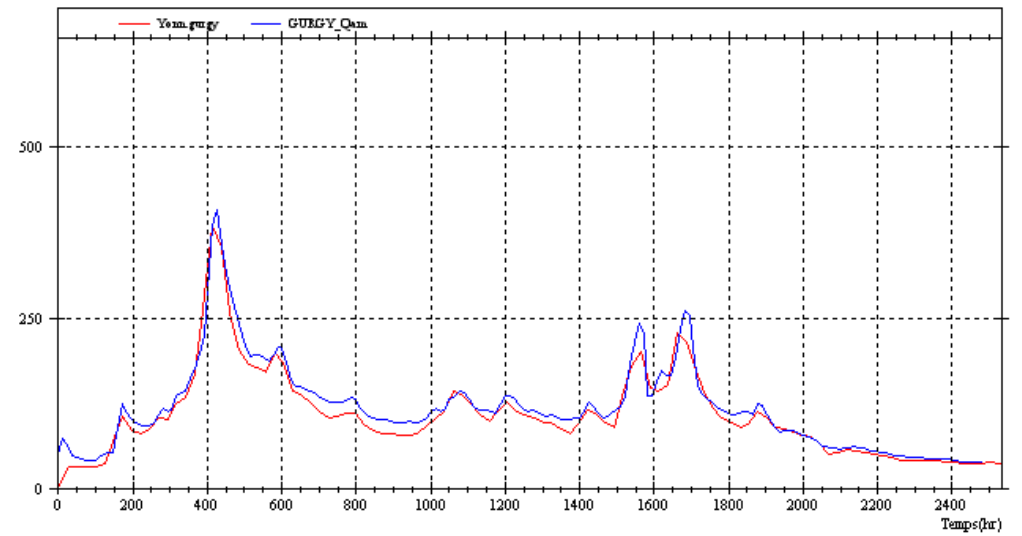

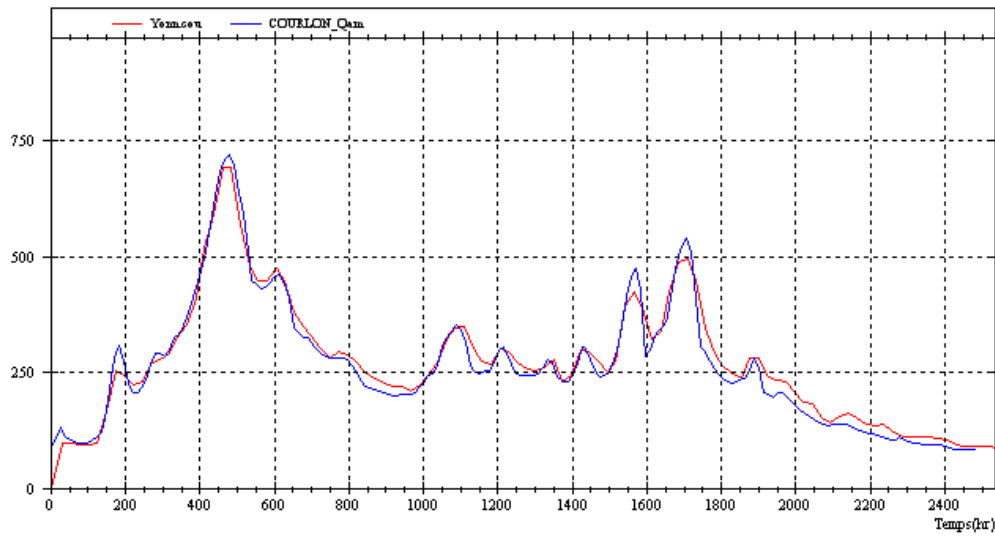

Yonne M99

Yonne D99

Yonne M01

**Annexe 2**  
**Résultats détaillés - Crue J95**

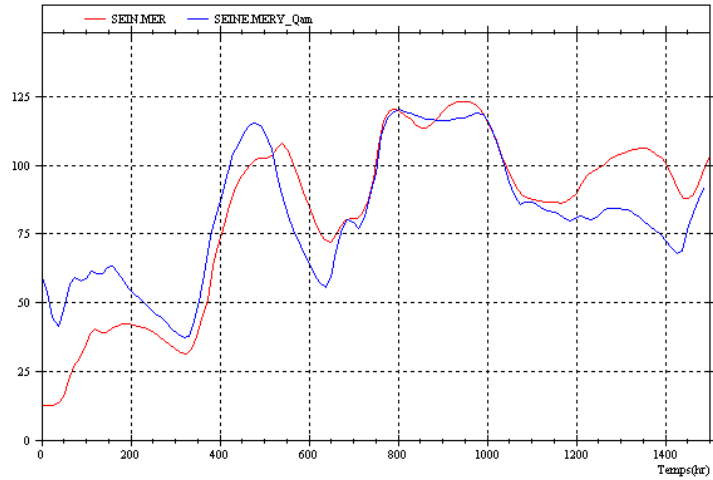

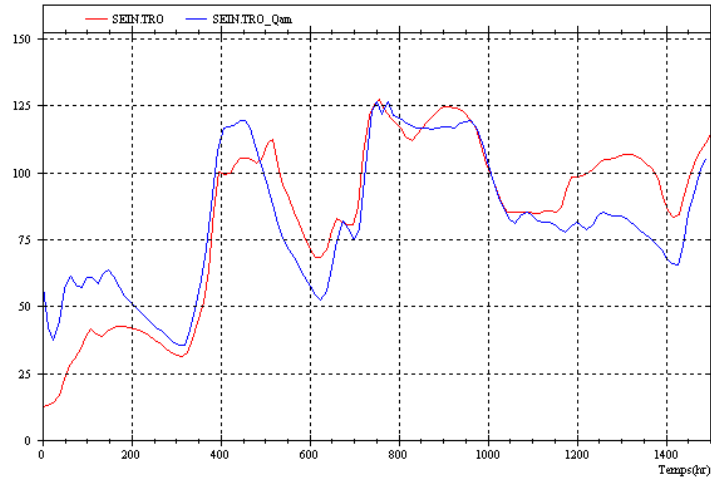

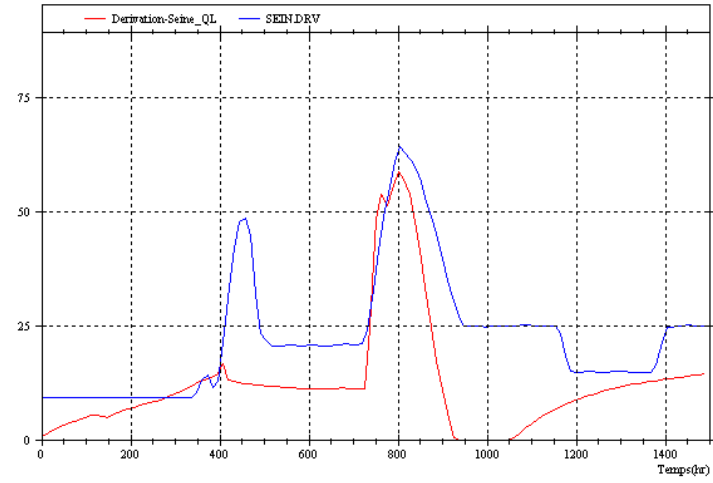

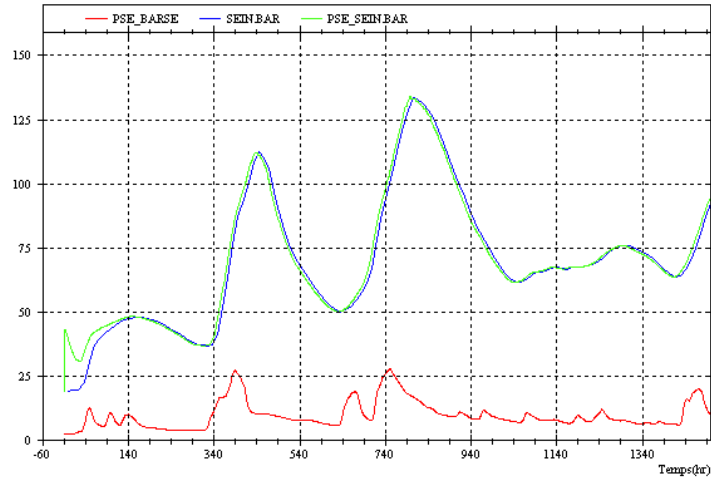

Aube J95RF

HydraRiv, scenario J95RF - debut simulation = 27/12/1994 07:00:00

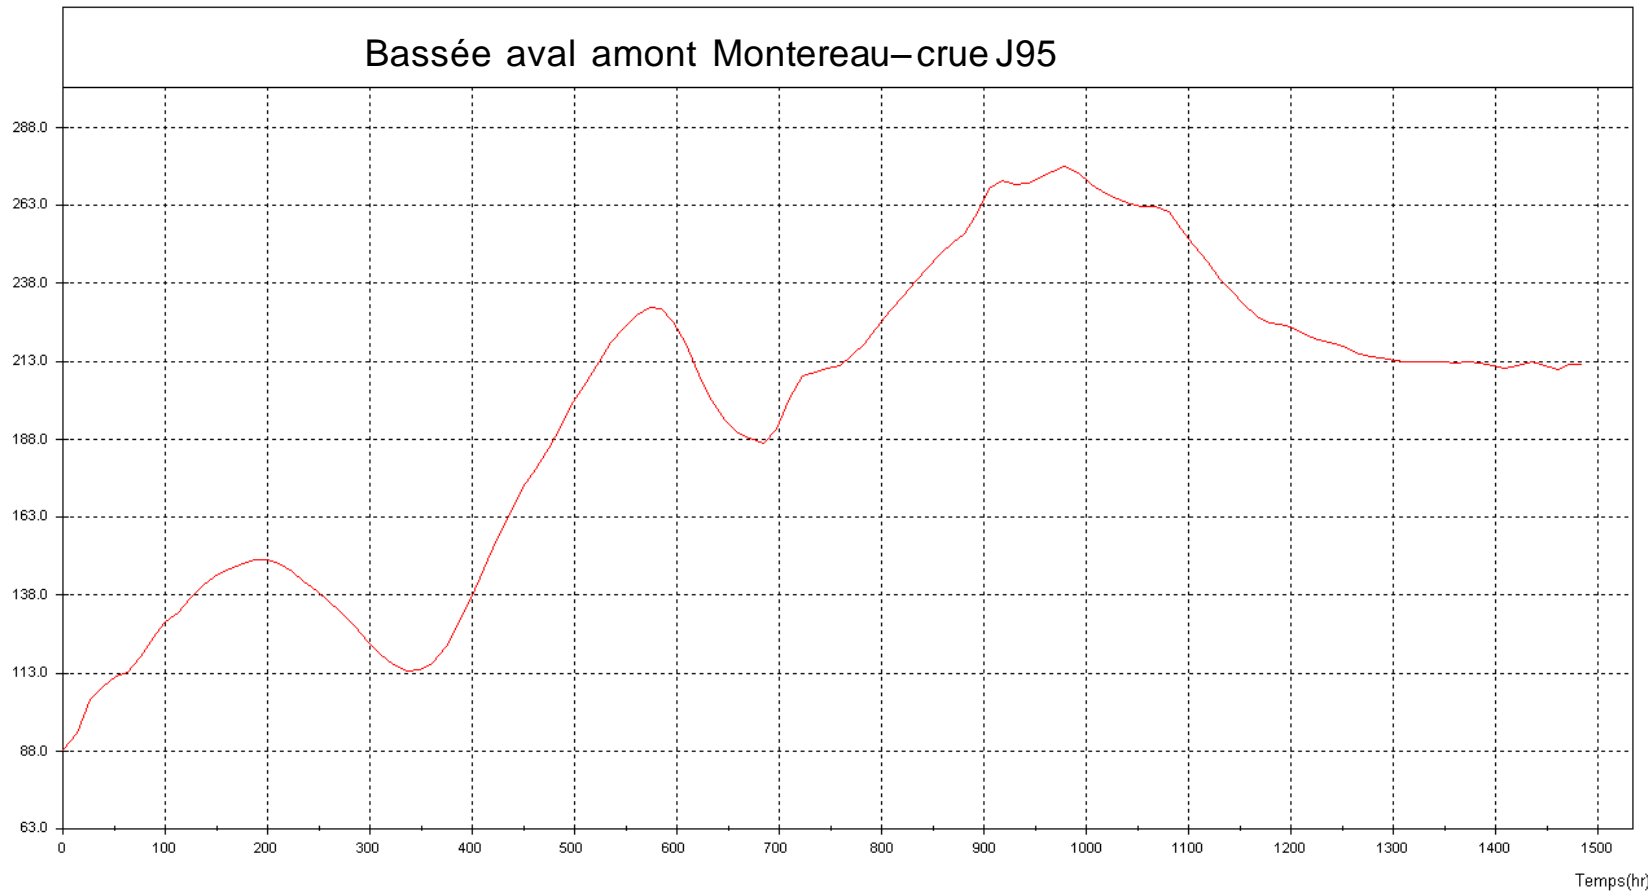

Haute Seine J95RF

HydraRiv, scenario J95RF - début simulation = 27/12/1994 07:00:00

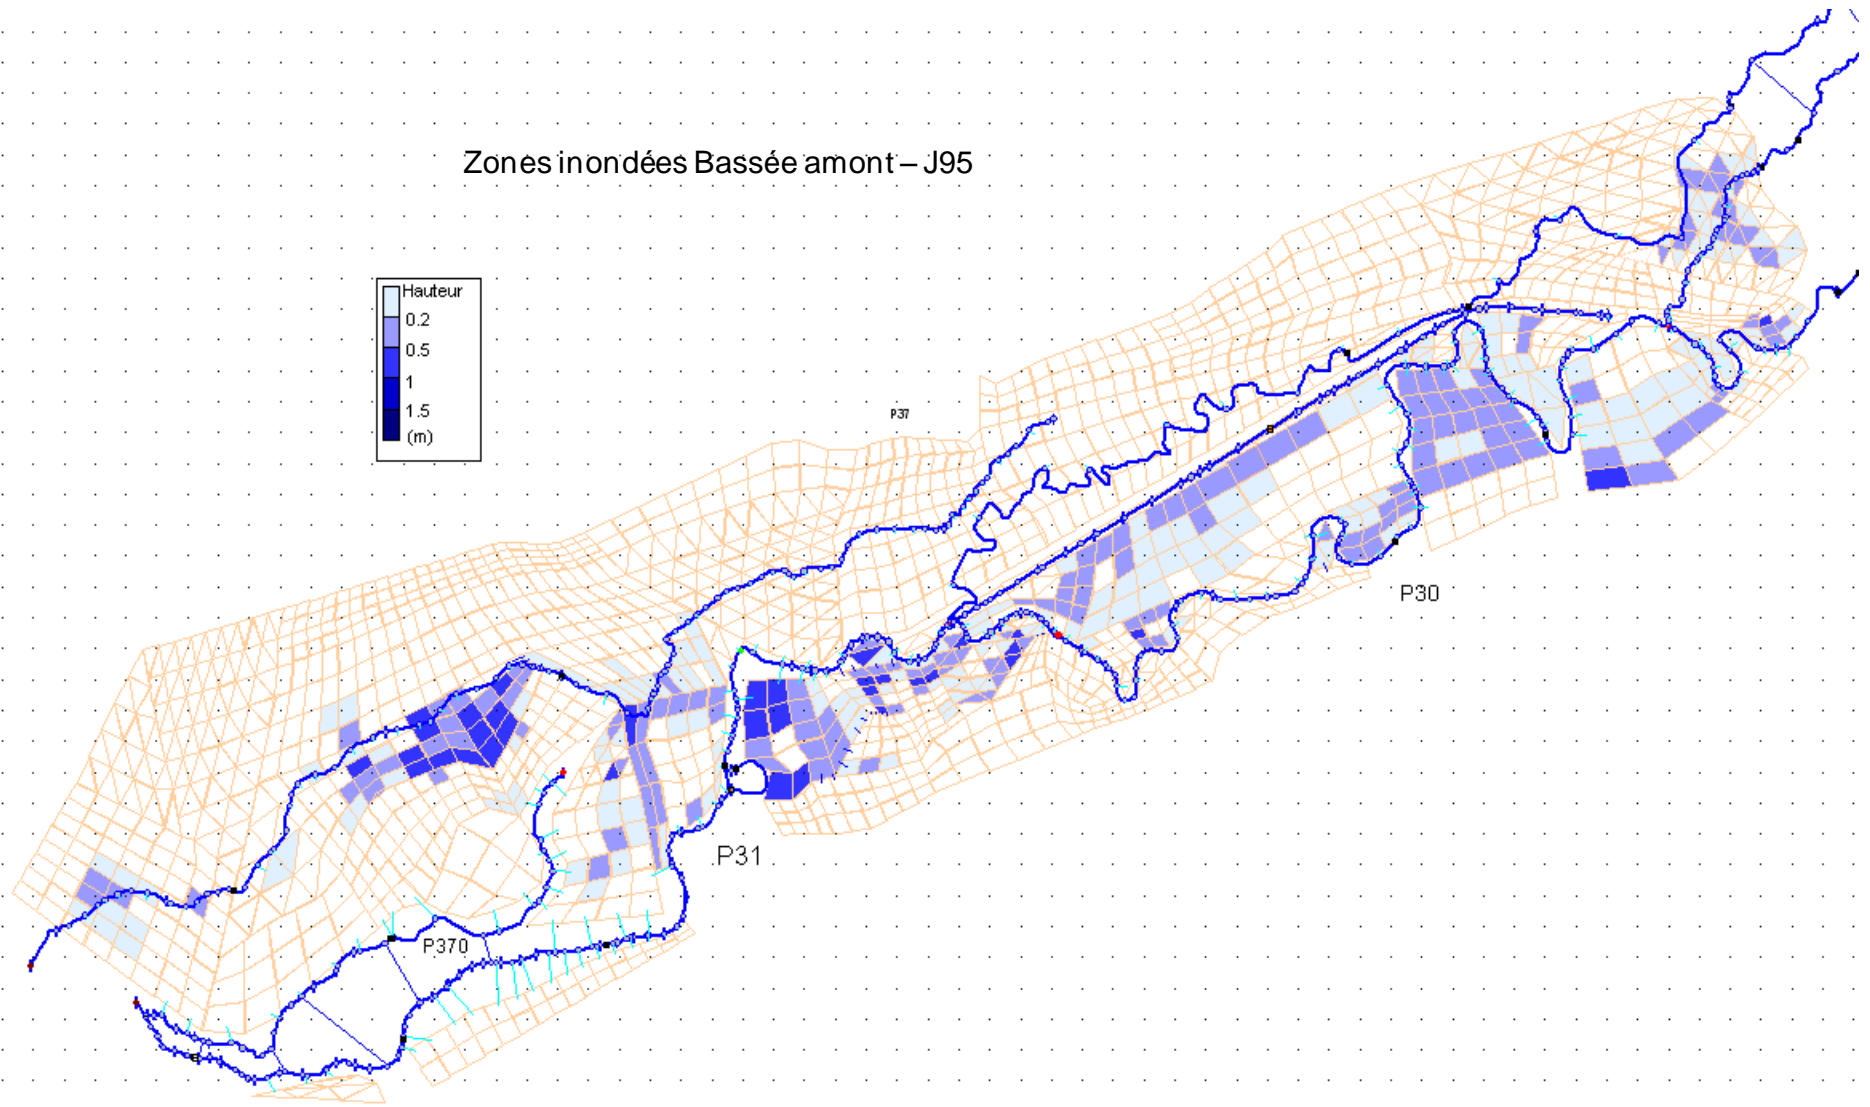

---

Débit (m<sup>3</sup>/s)

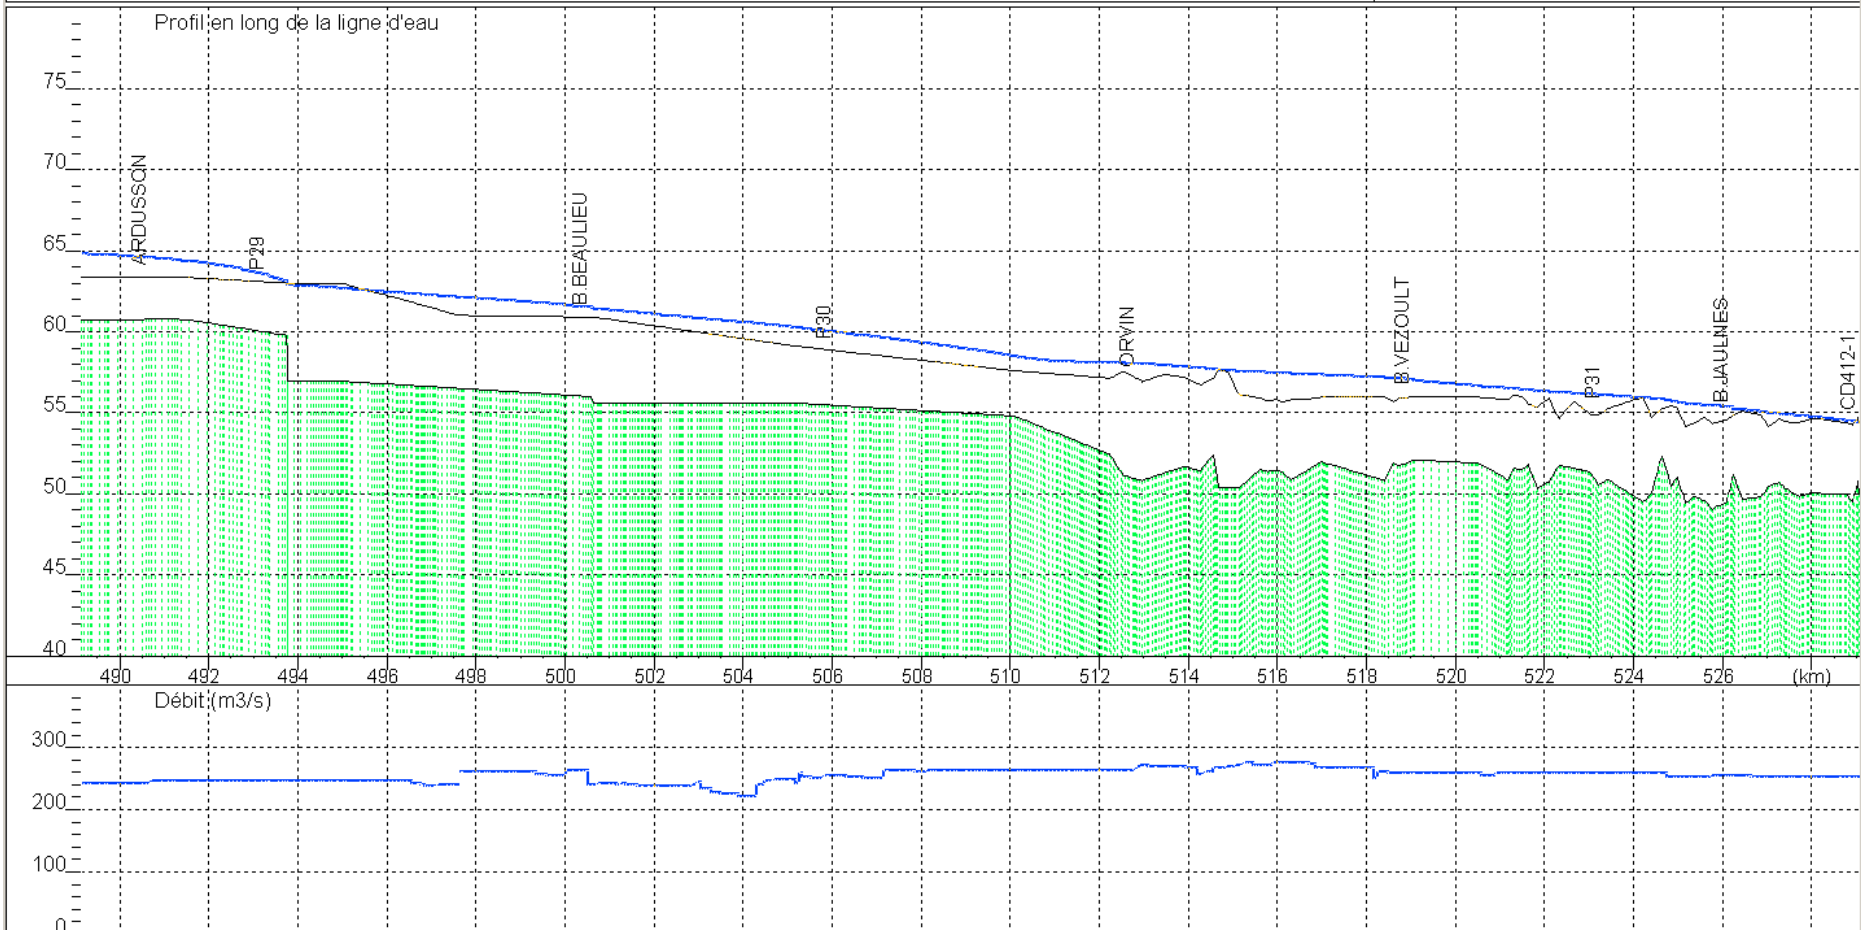

HydraRiv, réseau SM1

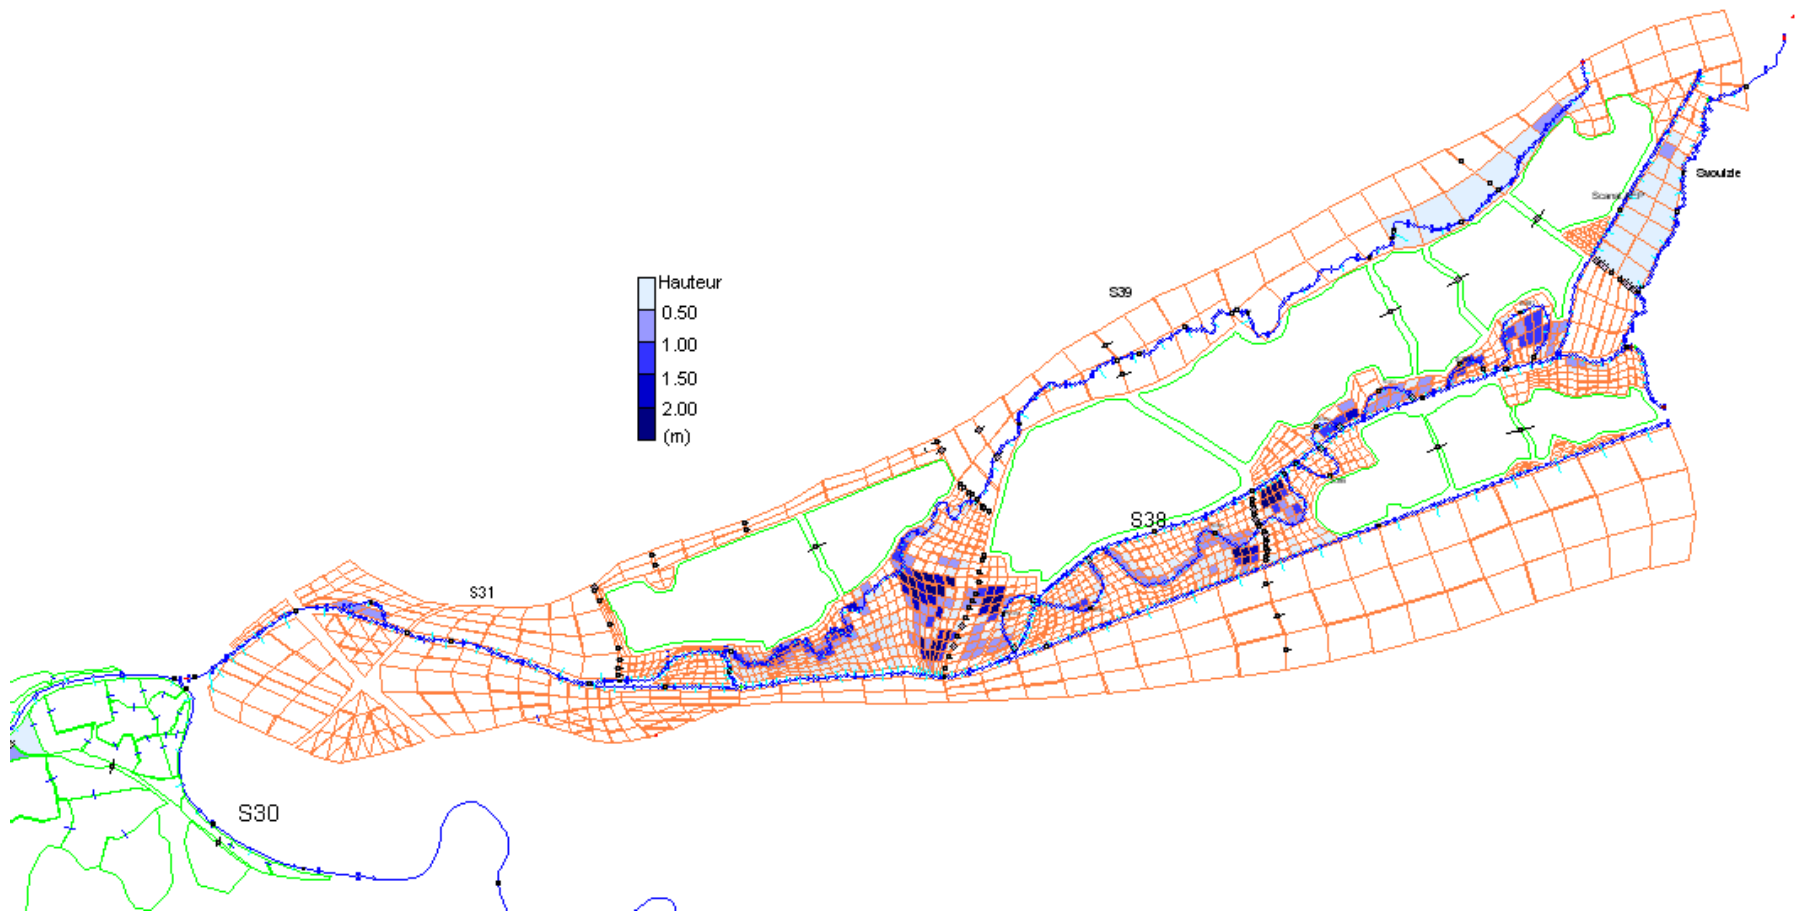

### Zones inondées Bassée amont – J95

Scénario: J95RF\_PSE

Valeurs maximales

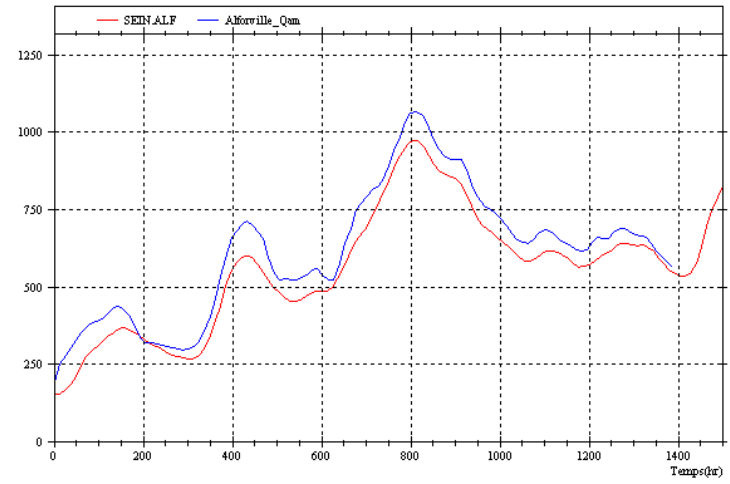

Scénario: J95RF\_SM1

Valeurs maximales

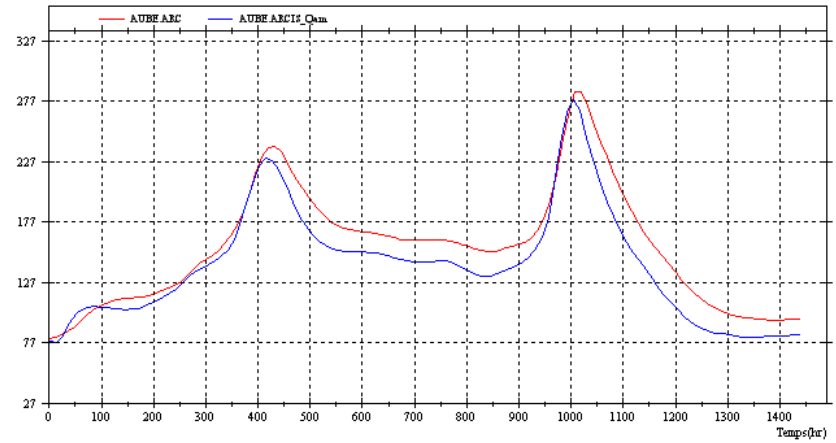

Qaval J95RF

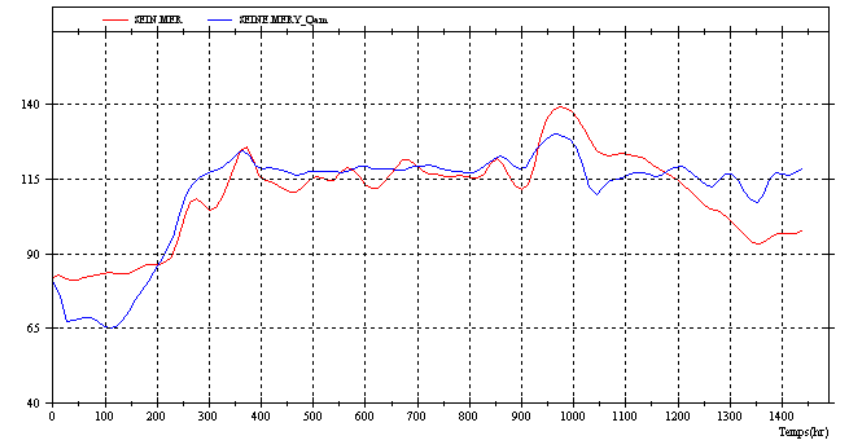

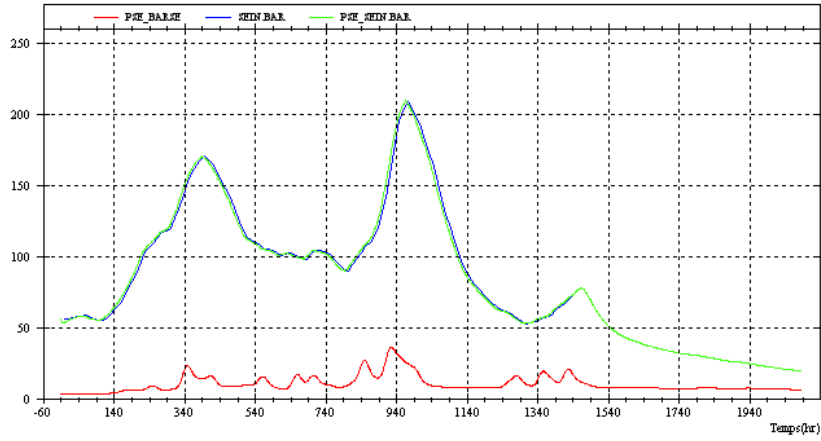

**Annexe 3**  
**Résultats détaillés - Crue J82**

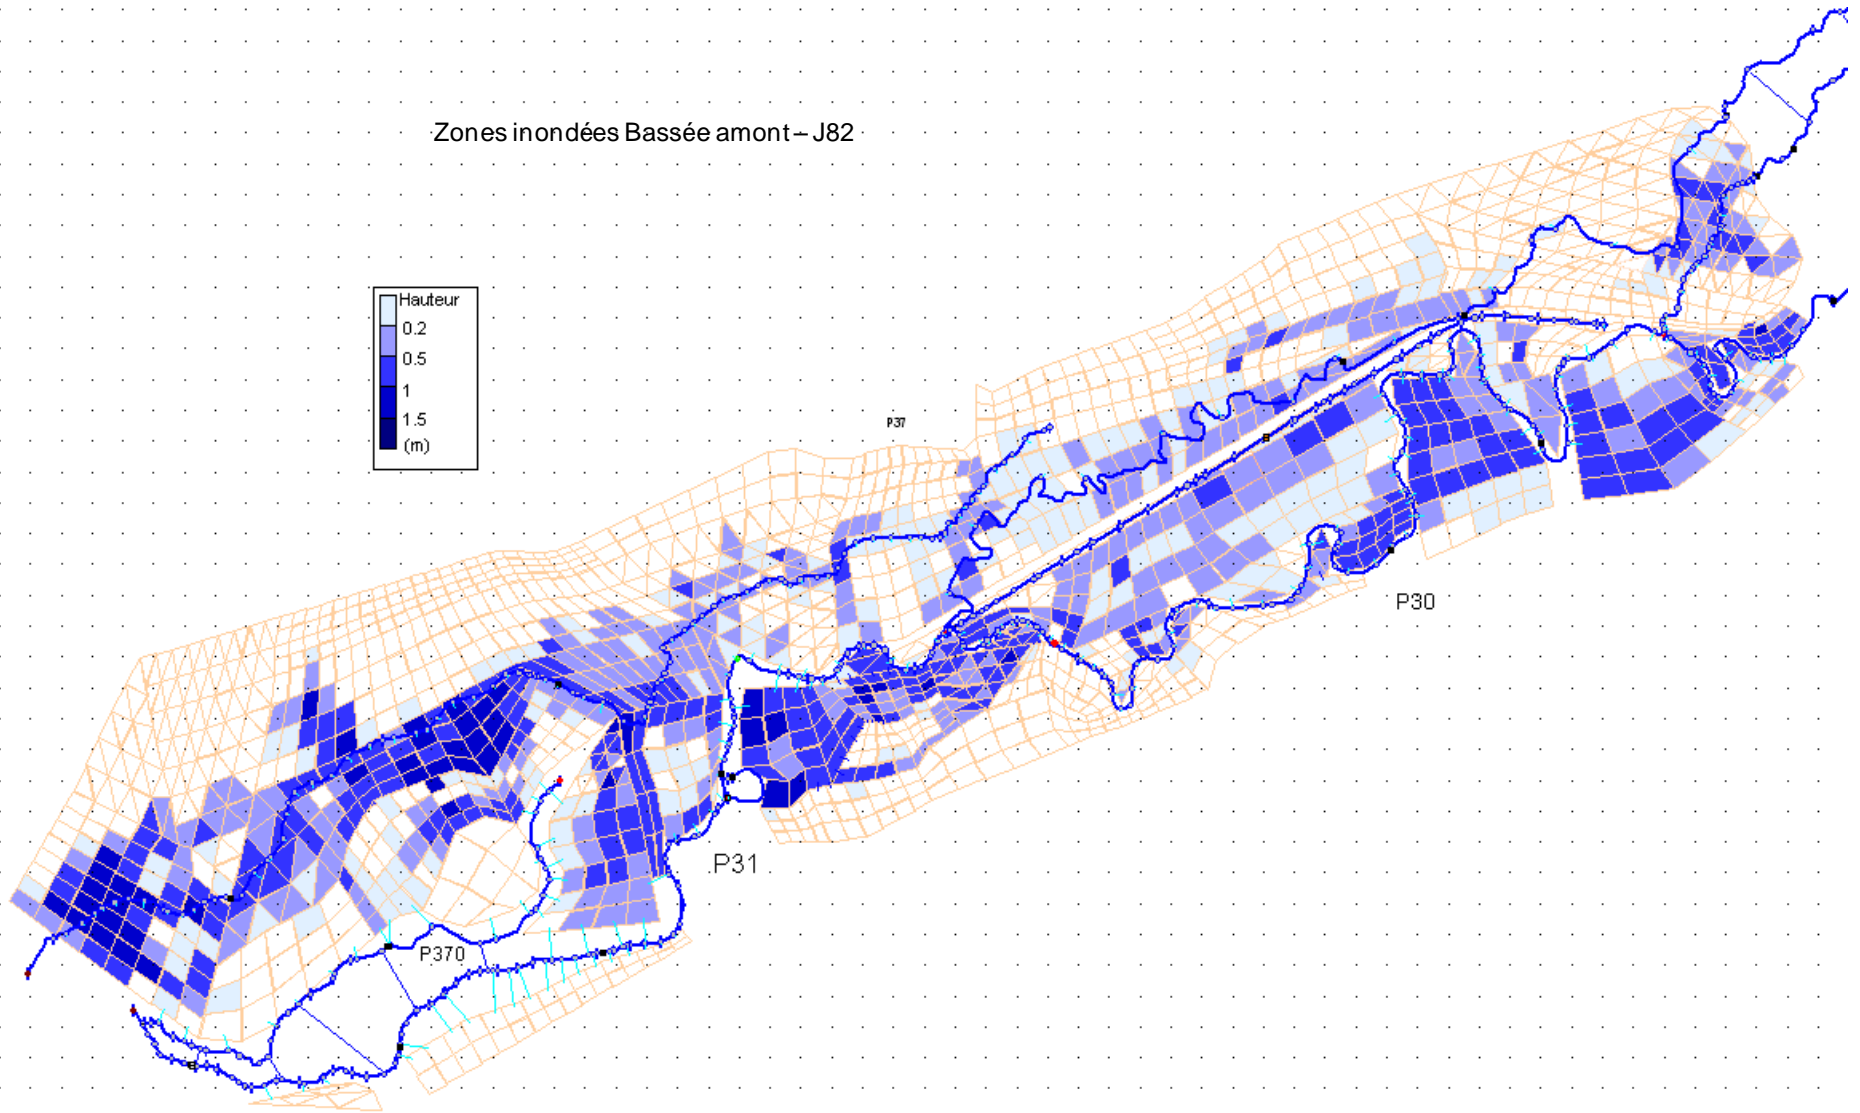

Haute Seine J82

HydraRiv, scenario 182RF - debut simulation = 03/12/1981

Zones inondées Bassée amont – J82

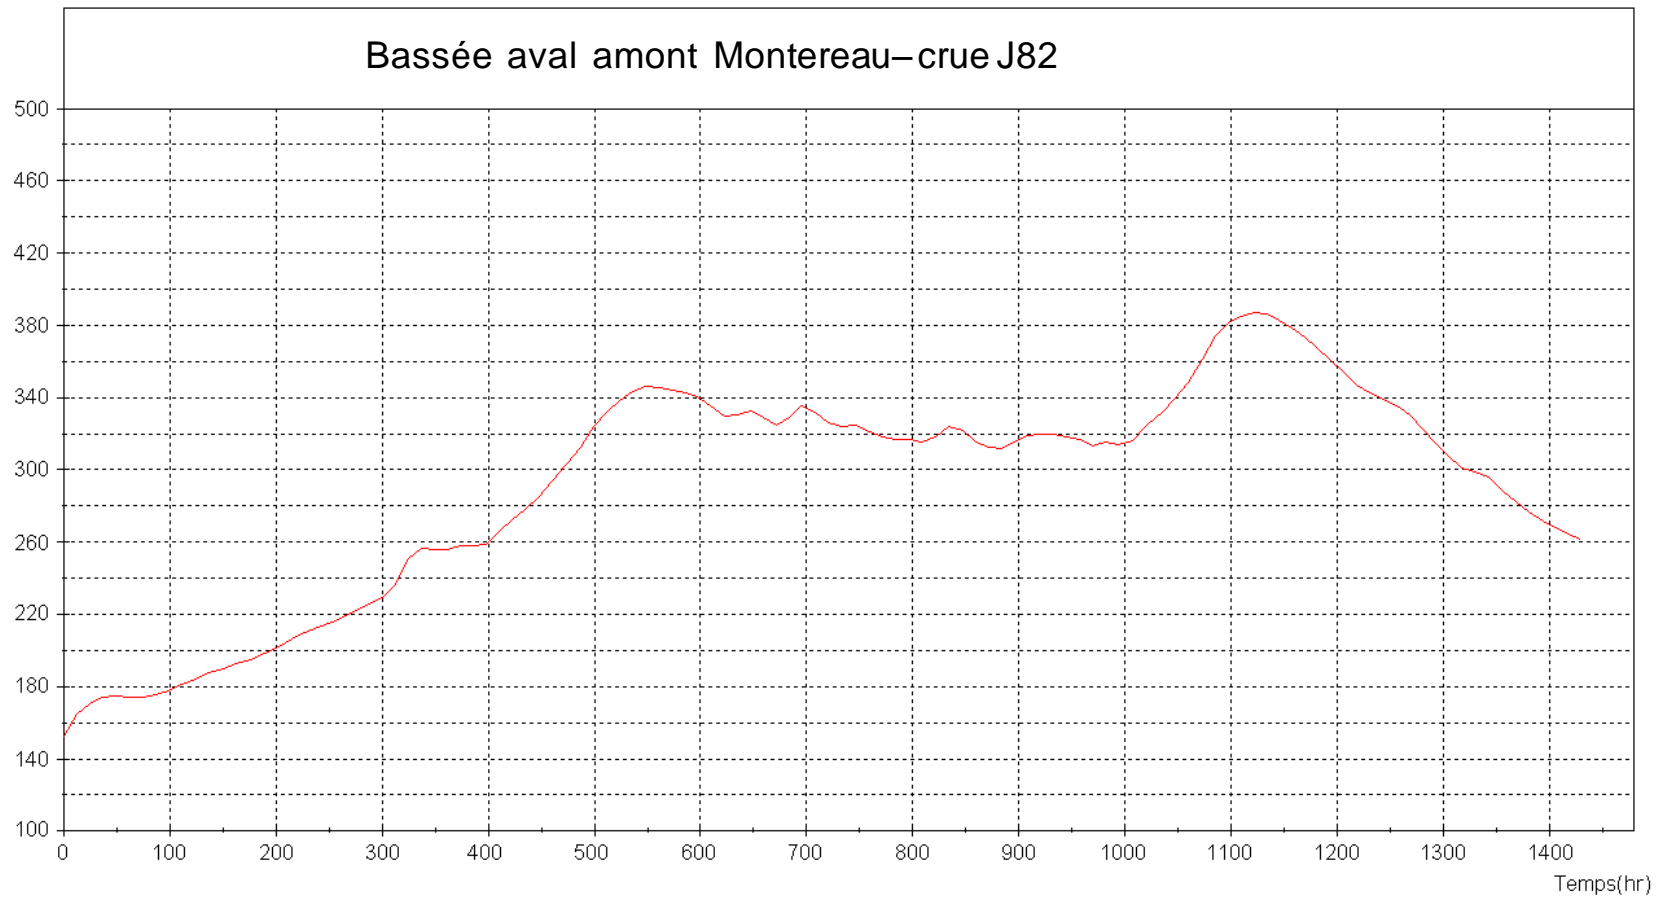

Scénario: J82RF\_PSE

Valeurs maximales

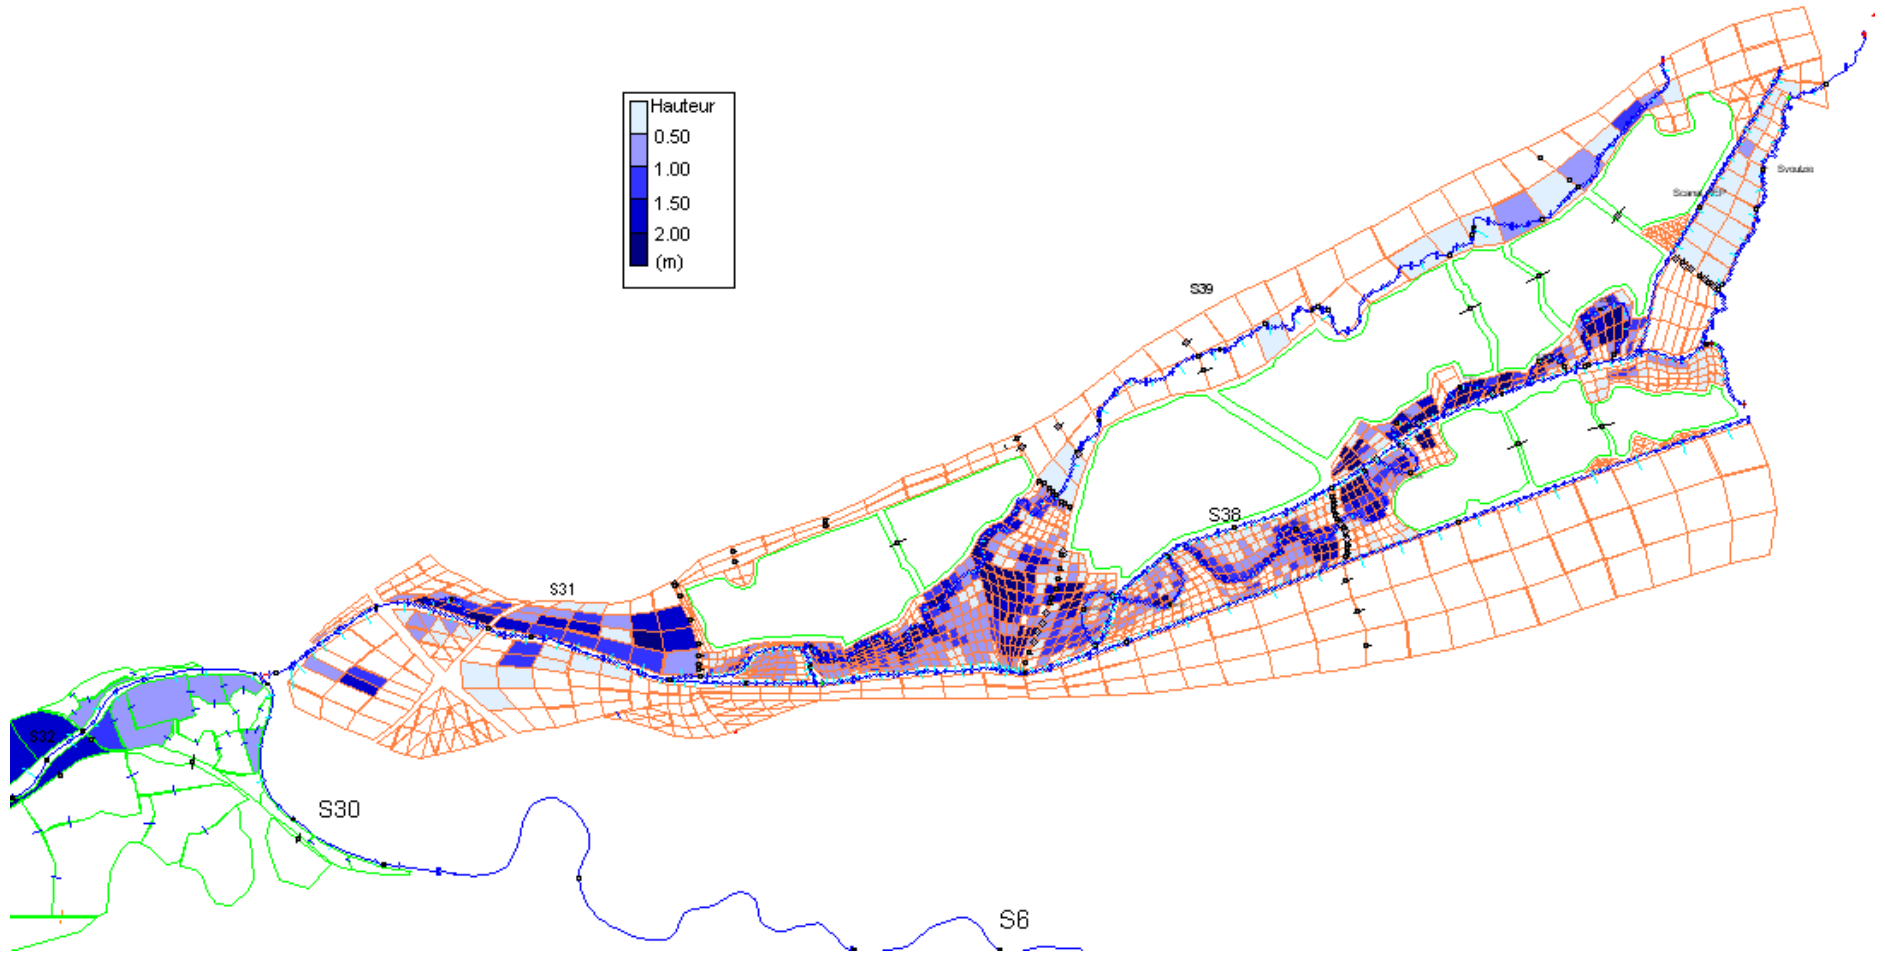

Débit (m<sup>3</sup>/s)

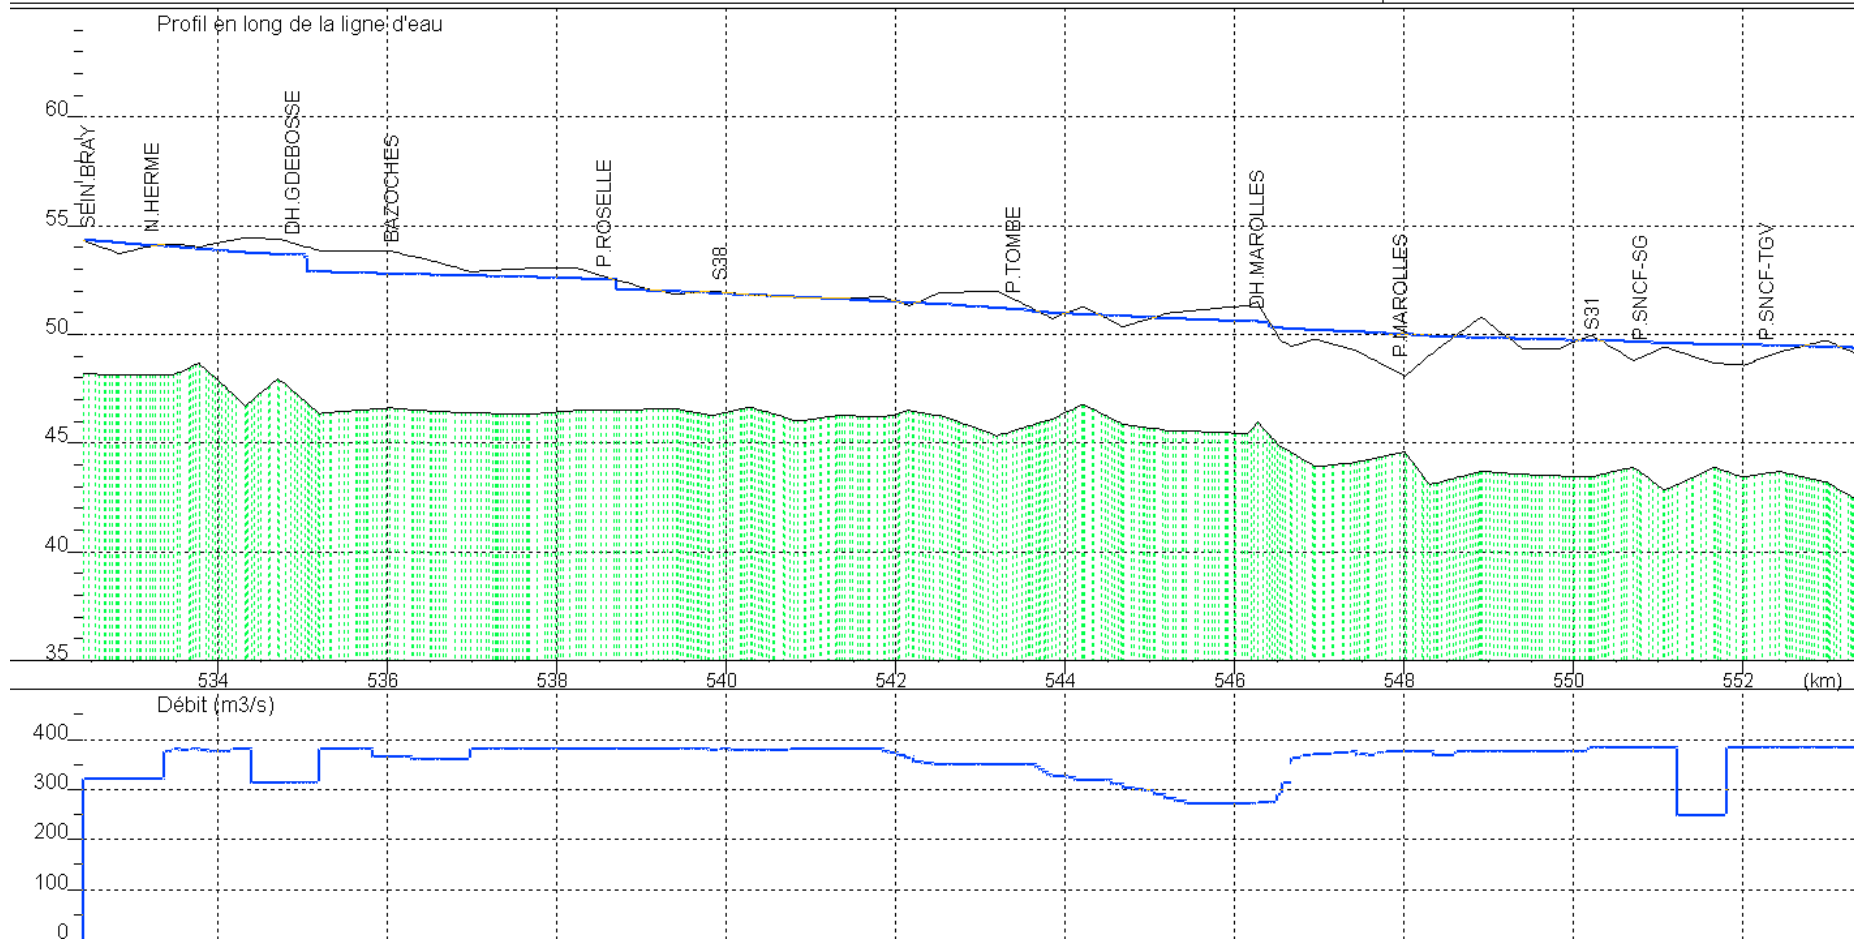

HydraRiv, réseau SM1

### Zones inondées Bassée aval– J82

Scénario: J82RF\_SM1

Valeurs maximales

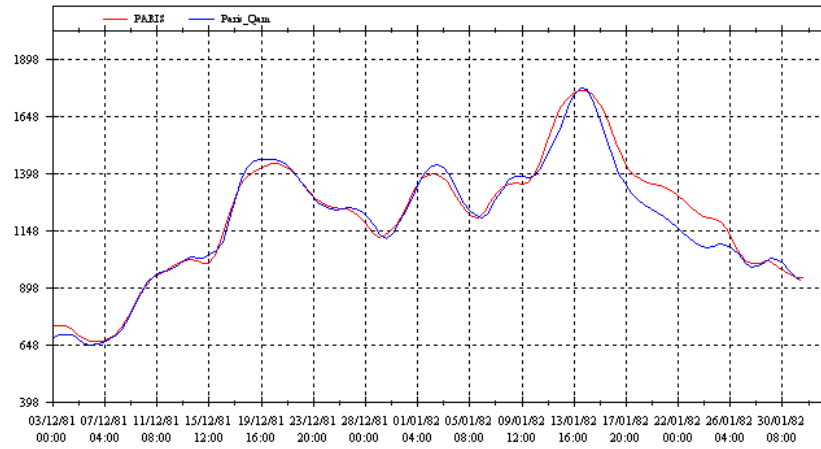

Montereau - Melun J82RF

Qaval J82RF

**Annexe 4**  
**Résultats détaillés - Crue J55**

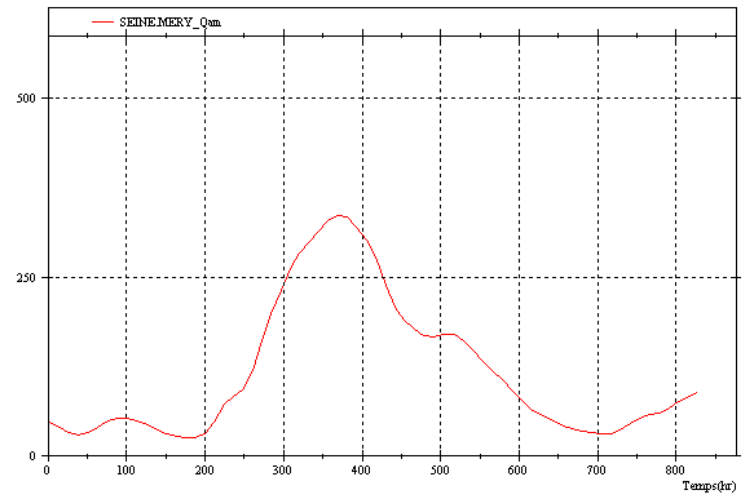

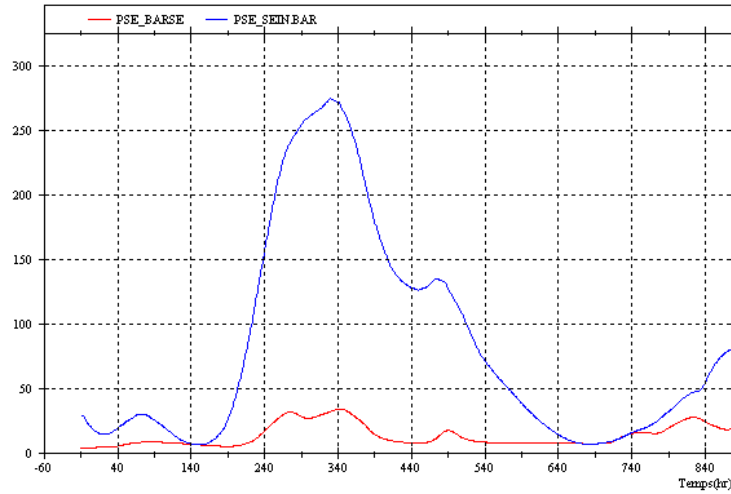

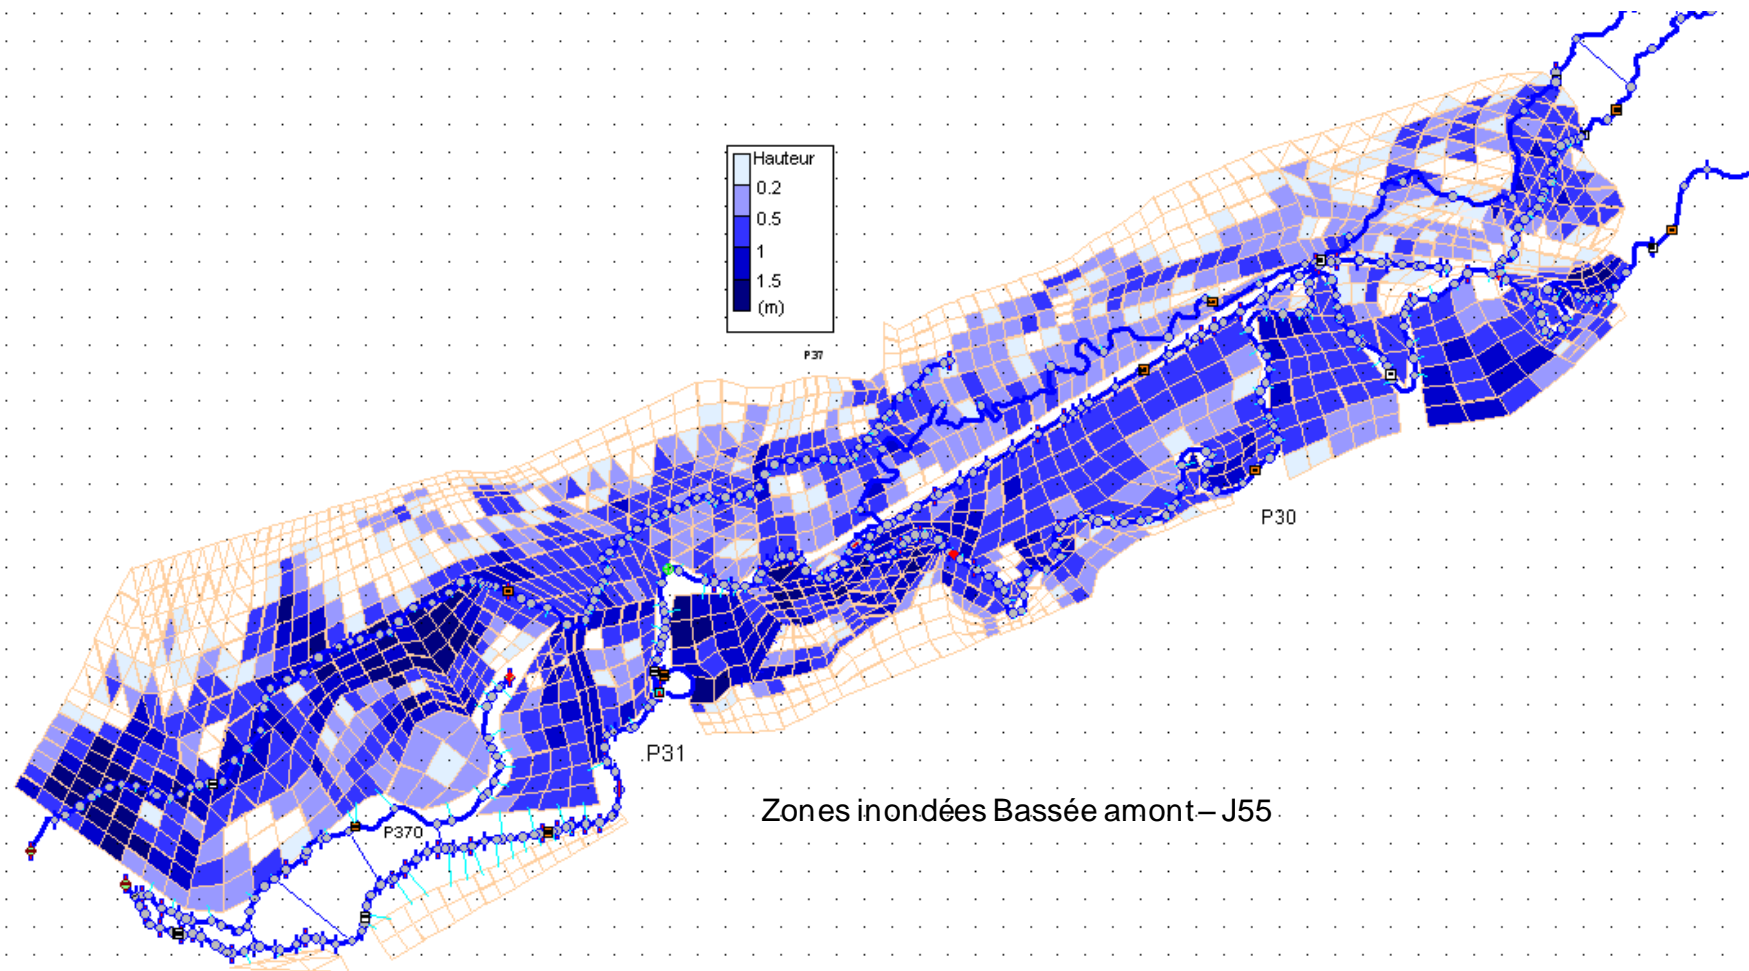

Aube J55

HydraKin\_scenario 155RF - debut simulation = 03/01/1955 07:00:00

Haute Seine J55

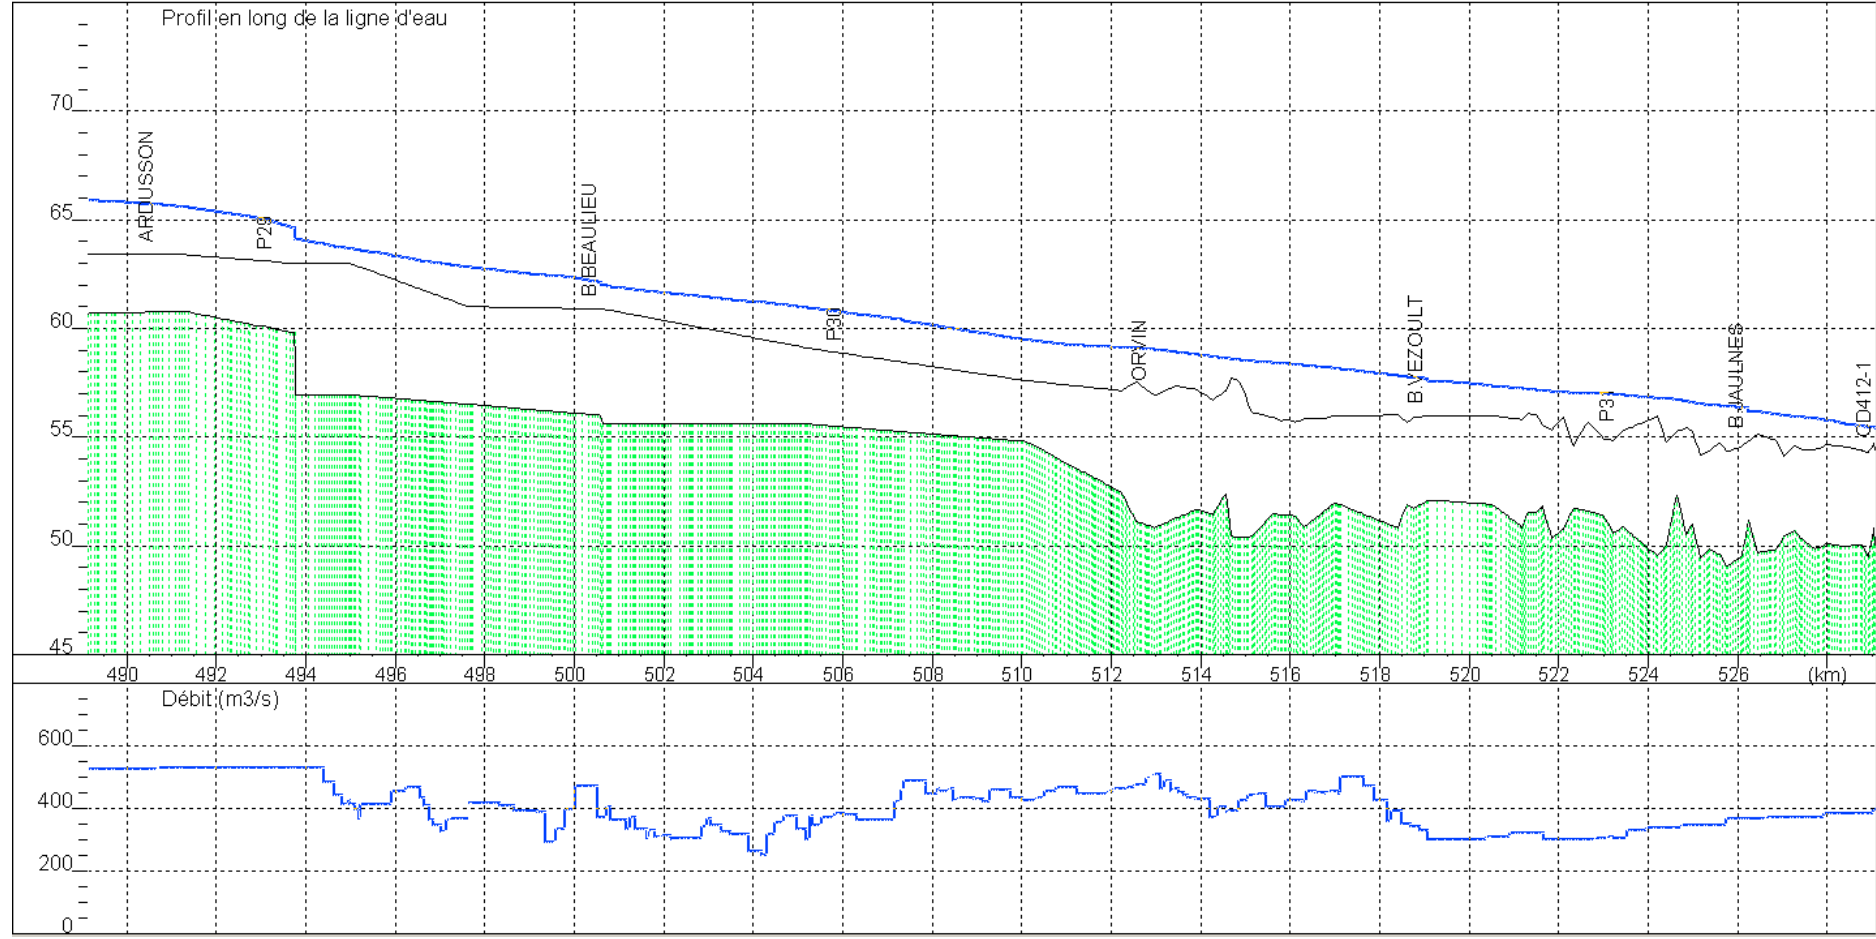

Zones inondées Bassée amont– J55

Scénario: J55RF\_PSE

Valeurs maximales

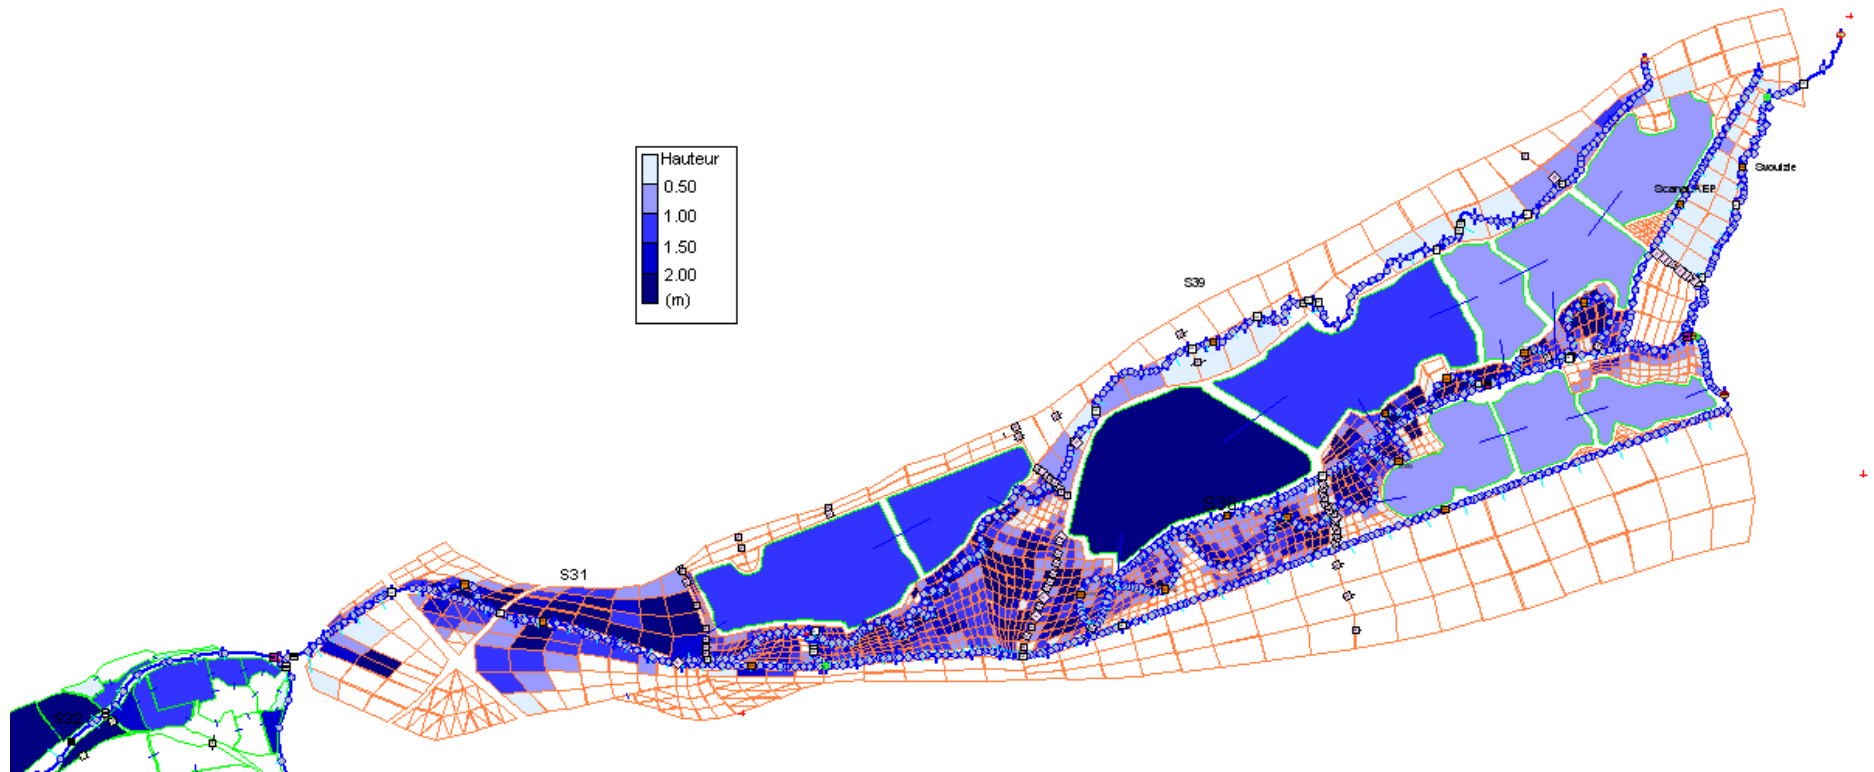

Débit (m<sup>3</sup>/s)

HydraRiv, réseau SM1

# Zones inondées Bassée aval– J55

Scénario: J55RF\_SM1

Valeurs maximales

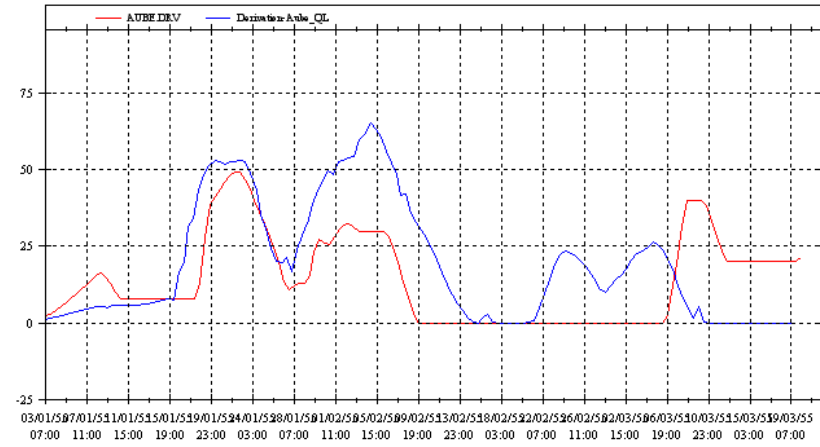

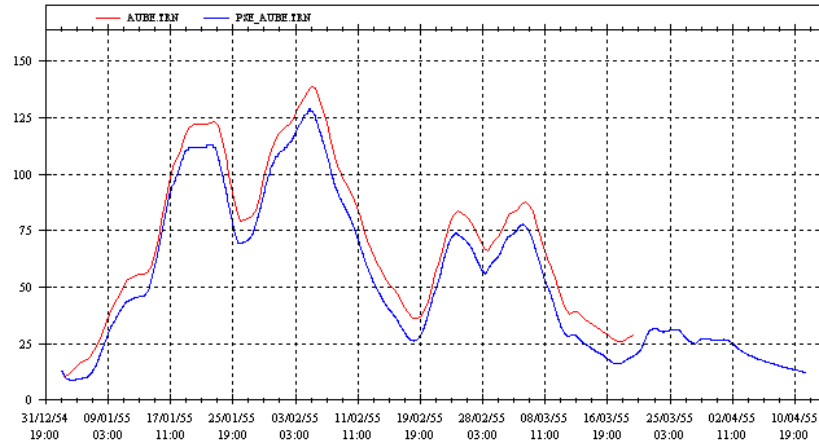

Qaval J55RF

**Annexe 5**  
**Résultats détaillés - Crue D93**

Aube D93

HydraRiv, scenario D93RF - debut simulation = 08/12/1993 07:00:00

Haute Seine D93

Montereau Melun D93RF

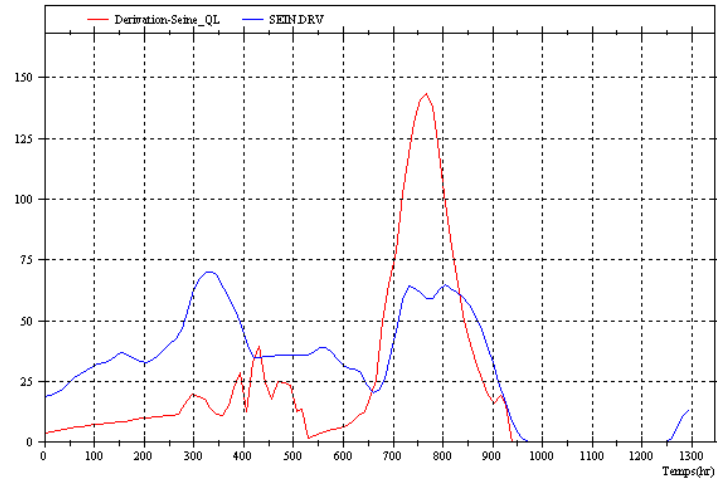

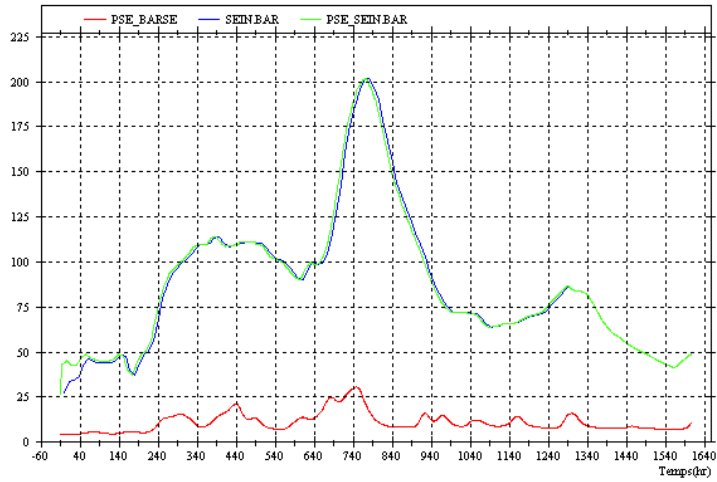

Qaval D93RF

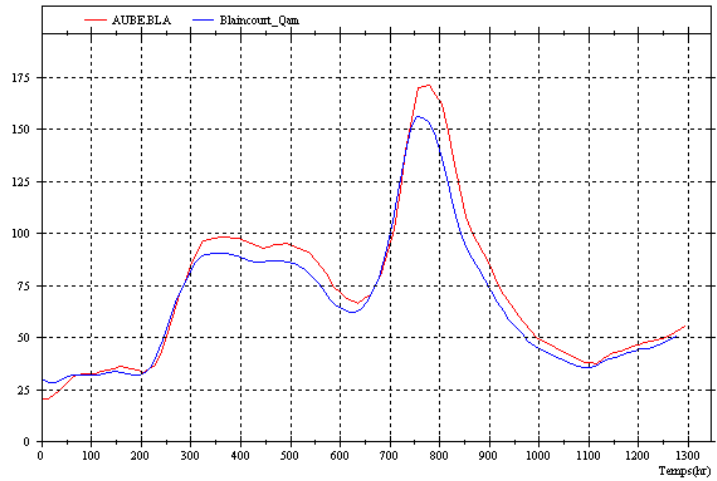

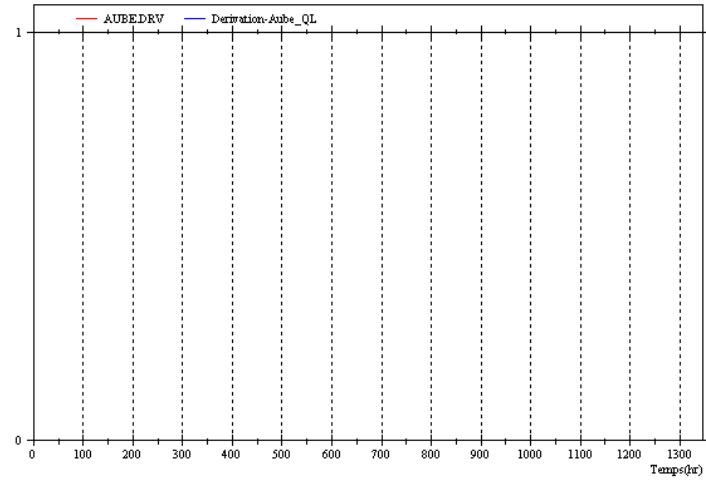

**Annexe 6**  
**Résultats détaillés - Crue F70**

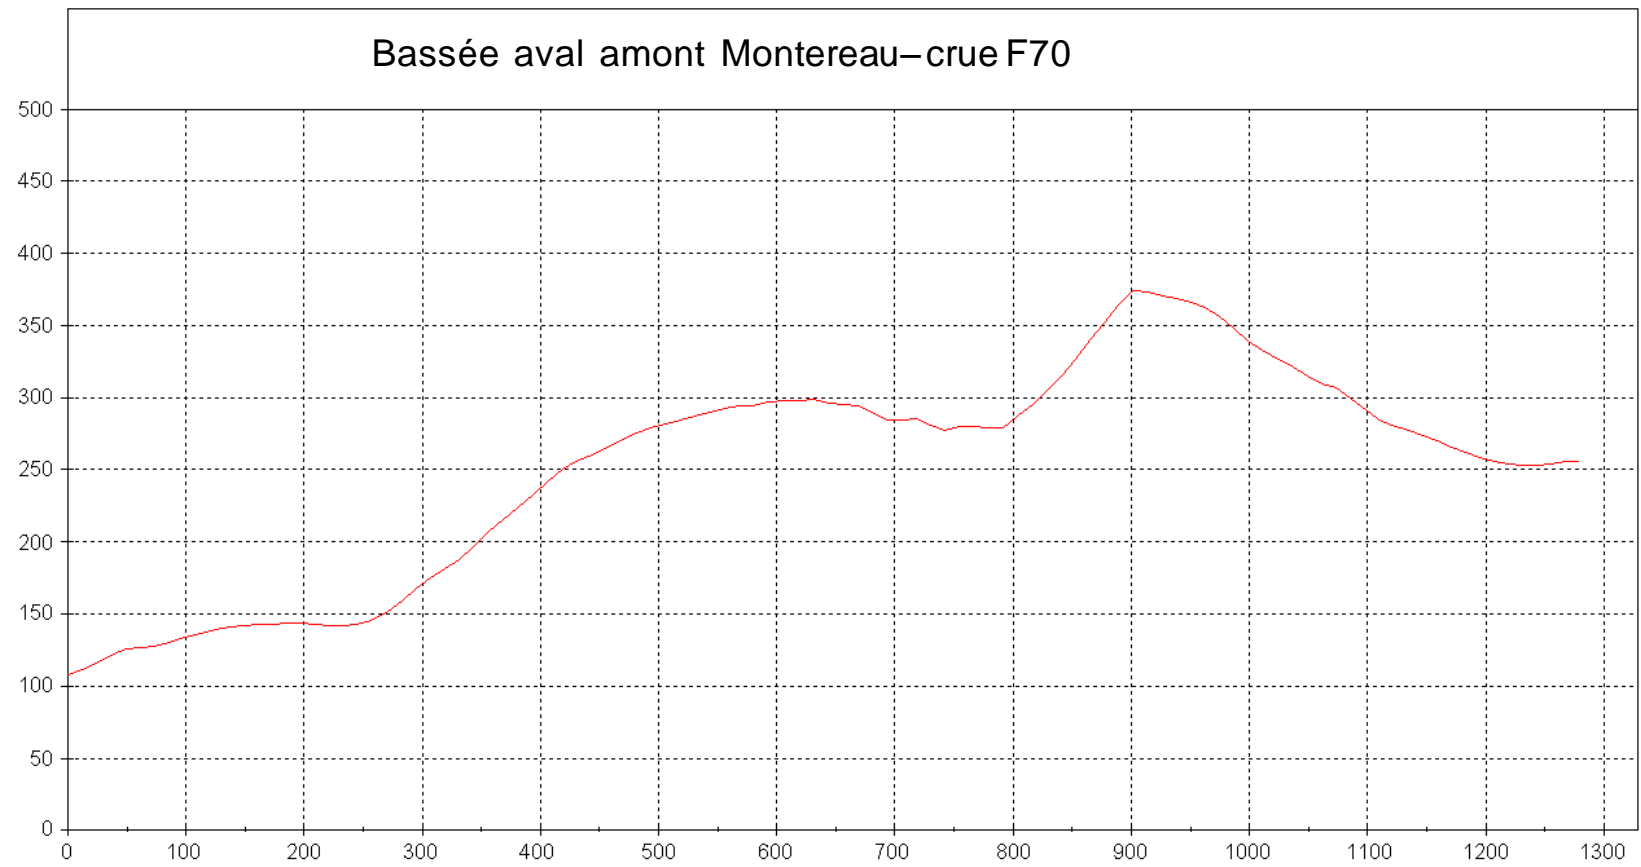

Haute Seine F70

Aube F70

Débit (m<sup>3</sup>/s)

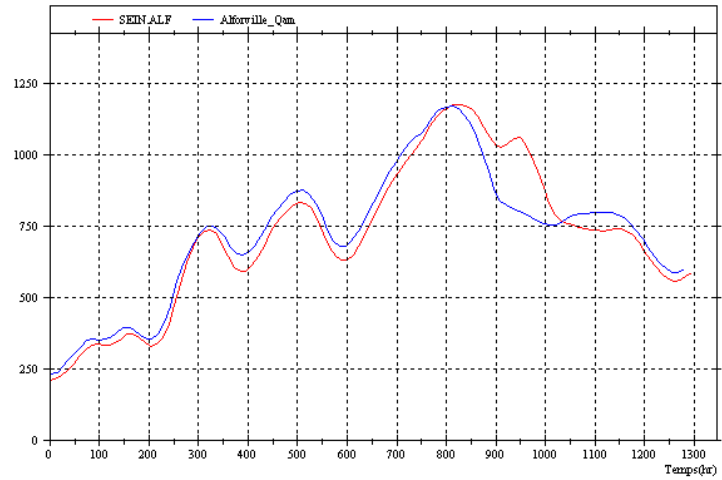

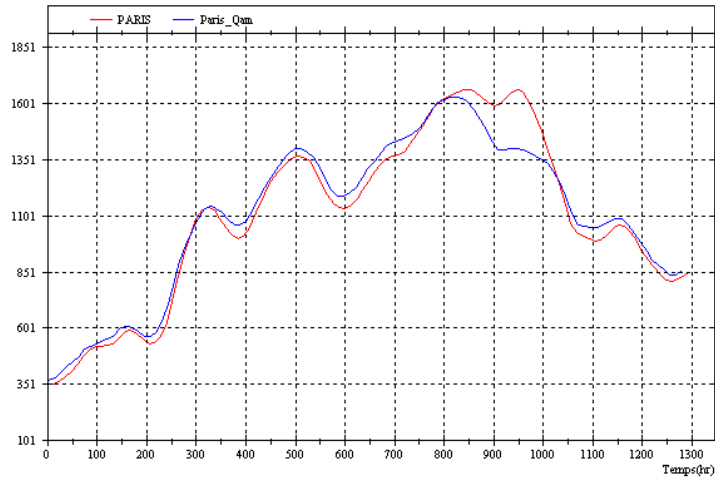

HydraRiv, réseau SM1

Ech Montereau - Melun F70

Qaval F70RF
